THE BLUE ROOF CLUB

We make fairytales come true

www.blueroofclub.com

Do you have a wedding on your mind, or a corporate event, a Birthday party or an intimate get together with your old friends? Then look no further! The Blue Roof Club offers an array of venues to cater to all of your requirements. An exotic property located between Eastern and Western suburbs of Mumbai, The Blue Roof Club is spread across a wide area and situated away from the chaos of the city which makes it an ideal venue option. The venue will provide utmost peace and serenity on your special day making it the most memorable event of your life. The beautiful green lawns and the glistening pool add up to the elegance of the venue. The Blue Roof Club gives a Complete package of luxury, fine dining and great way of celebration at affordable complete prices.

MR. MOLOY BAKSHI,
CHAIRMAN AND OWNER OF THE BLUE ROOF CLUB

From The Director's Desk

Mr. Moloy Bakshi began his journey as an architect in the year 1990 after graduating from L.S. Raheja. College Of Architecture. He achieved great success and executed various projects which includes malls, I.T. parks, residential as well as commercial complexes. Thane was witnessing a construction boom around that time and huge commercial complexes were coming up across Godhbundar road. Being a visionary, Mr. Moloy Bakshi saw an opportunity in this and decided to introduce a much-needed concept. He let his own passion for leisure activities and sports be the guide.

"I have always loved nature and have instilled these values in my family as well and therefore wanted to provide a gateway for people to relax, unwind and spend quality time with their families and friends in a safe yet premium space, close to nature where they can focus on their well-being."

Success has a destination at The Blue Roof Club

Mr. Moloy Bakshi started acquiring land from 2003 onwards and completed the club in four years on 15th of November 2007. His motivation behind building the club was the love of nature and the love for fitness and swimming. These pursuits inspired the design of The Blue Roof Club which is spread across 7 acres of lush green landscapes. The Blue Roof Club , caters to the needs of you as an individual as well as the needs of your family and friends.

Everything under one roof, THE BLUE ROOF.

Capacity Of 200 Pax

STAY OPTIONS

At The Blue Roof Club, we have the perfect boutique rooms for the bride, groom, family and the guests so you do not have to worry about travel on your special day !

OUR EFFORTS TO GO GREEN

Rising temperature, pollution, deforestation are the major aspects of the ongoing climate crisis.

The efforts that we take to conserve our planet today will pave the road for a better tomorrow.

It is our endeavour at The Blue Roof Club to reduce our carbon footprint and lean towards the use of sustainable energy.

Now's the time to be kinder to the environment!

Solar energy

Solar energy systems/power plants do not produce air pollution or greenhouse gases. Using solar energy can have a positive, indirect effect on the environment when solar energy replaces or reduces the use of other energy sources that have larger effects on the environment. We have a 180 kw solar energy system installed through the structures of the property which takes care of 90% of the power usage.

Composting

Organic waste generates methane, a potent greenhouse gas. By composting wasted food and other organics, methane emissions are significantly reduced. Compost reduces and in some cases eliminates the need for chemical fertilizers. After dry and wet waste is separated the wet waste is collected in large containers. A specific compound which accelerates the degradation of the waste into manageable organic granules is added. This process turns the waste into fertilizers which is used for the gardens trees and plants across our properties.

Rain Water Harvesting

The rainwater that accumulates on the terraces of the structures drains through a channel of pipes that lead to water harvesting pits. The water that is collected in these pits is drained into the ground which charges the groundwater levels.

Afforestation

Afforestation is the establishment of a forest or stand of trees in an area where there was no previous tree cover. We have planted and groomed more than 15,000 trees across our properties.

Groundwater Replenishment

We have kept more than 80% of our area open and unpaved which helps in rain water percolation and recharges our ground water. This is also enhanced by level contouring so that water accumulation is achieved.
